WHAT WILL YOU LEARN IN THIS MAJOR?

Students will gain an integrated understanding of two fields of growing significance: Latin American studies and the study of Latinx people in the United States. This major explores the context and forces that have shaped the experiences of members of Latin American societies and U.S. Latinx communities. The major engages students in the interdisciplinary study of the political, historical, socio-economic and cultural possibilities and obstacles for achieving social justice and equity; cross-cultural and intercultural understanding; respect for human integrity and dignity; and awareness of political and human rights.

This major equips students with analytic tools for deep interpretation, information skills for self-guided research, and the communications skills critical for workplace success. Graduates of this major will be historically informed, culturally aware, and ethically attuned to societies beyond the U.S. borders and to diaspora communities within the United States. The major provides students with the intellectual start-up capital for careers in our 21st century, globalized economic order.

IN THIS MAJOR YOU WILL ...

Develop an understanding of the growing Latinx presence in the United States

Explore the political, historical, socio-economic and cultural dimensions of Latin America
